

THE SMART PACKAGE ROOM FOR MULTIFAMILY

MAKING PACKAGE PICKUP
& DROPOFF SIMPLE

SmartPackageRoom

TRADITIONAL PACKAGE ROOMS

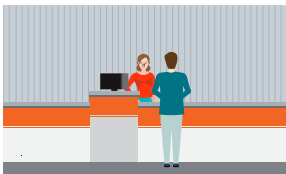

ARE DISORGANIZED AND UNPREPARED FOR RISING DEMANDS

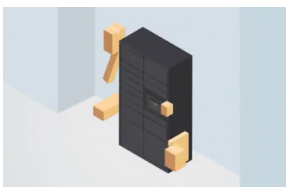

LET THE SMART PACKAGE ROOM DO ALL THE WORK

For property managers across the country, **Position Imaging's Smart Package Room** has become the clear choice for ensuring simple, secure package delivery and pickup.

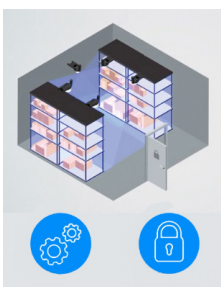

WHAT ARE PROPERTY MANAGERS' OPTIONS?

OPTION #1: DO IT YOURSELF - Default pickup options are time-consuming for staff to manage, are not operated 24/7, and items are often not properly secured.

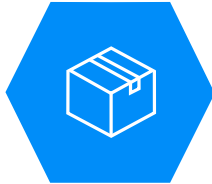

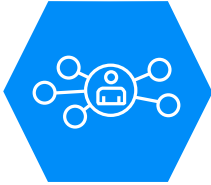

OPTION #2: LOCKERS, "Packages that Don't Fit" - Unfortunately, lockers are costly, cumbersome, take up a great deal of space, and are not flexible enough to accommodate varying package sizes.

OPTION #3: SMART PACKAGE ROOM, "Easiest Solution For Couriers & Residents" - Flexible system where couriers scan in packages, place them on open shelves and a computer-vision based system scans & monitors their movement until the resident picks up the package.

“ Our apartment community now has a central hands-off system to manage package pickup and deliveries. Our residents and couriers have said the new package room has made their lives so much easier!” – **Mass Mills Team**

HOW PROPERTY MANAGERS BENEFIT FROM THE SMART PACKAGE ROOM:

 <p>Higher Package Capacity</p>	 <p>Agnostic to Package Size & Type</p>	 <p>Easier & Faster Package Pickup</p>
 <p>Better Courier Adoption</p>	 <p>No Resident Fees or Sign Ups</p>	 <p>Low Maintenance & Up-Front Costs</p>

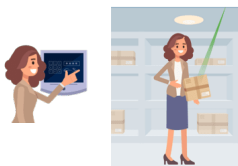

HOW SMART PACKAGE ROOM WORKS:

- **A COURIER SCANS THE PACKAGE LABEL** and places the package on any shelf in the Smart Package Room where an intuitive computer system monitors the package 24/7 until retrieved by the recipient.

- **THE RECIPIENT IS INSTANTLY NOTIFIED** and receives a picture along with a QR code and PIN to enter the secured area any time 24/7.

- **THE RESIDENT SCANS THE QR CODE** (or enters the PIN) to enter the room where laser and audio cues guide the recipient to the package's exact location.
